CLOZE TEST

10 MARKS

Inadequate information among (1)workers is contributing to misdiagnosis and delayed treatment for children with sickle cell anaemia. This is largely because the condition does not (2) in one clinical presentation and require multiple tests (3) proper diagnosis. In some children, it might present a fever and one may assume that it is malaria or pneumonia. “There is(4).....diagnosis by health workers due to lack of awareness on the condition and we hope that collaborative guidelines can be developed to assist in addressing this issue,” said Professor Chite Asirwa, an oncologist at the Moi Teaching and Referral Hospital, at a recent sickle cell disease stakeholder meeting in Eldoret. Delayed diagnosis may lead to health complications or even (5).....

The World Health Organisation estimates that about five percent of the world’s population carries traits for haemoglobin disorders, mainly sickle-cell disease and thalassaemia, which are (6)..... on to offspring by generally healthy patients. An estimated 300,000 thousand babies with severe haemoglobin disorders are born in the world every year.

Most patients don’t live past age 25. They (7)..... to complications of the disease, yet most of these deaths can be prevented.

“Vaccination, therapy and medication (8).....reduce cases of hospitalization and painful crisis-when sickle-shaped red blood cells (9).....blood vessels and restrict blood flow to body organs, leading to pain, death of cells and damage to organs,” observed the specialist, who (10)..... serves as the oncology and haematology programme director for the Academic Model for Proving Access to Healthcare.
